Refractive Between 2 media.

$$\frac{\sin i}{\sin r} = \frac{c_1}{c_2}$$

$$w n_g = \frac{n_g}{n_w}$$

$$= \frac{1.50}{1.33}$$

$$= 1.1$$

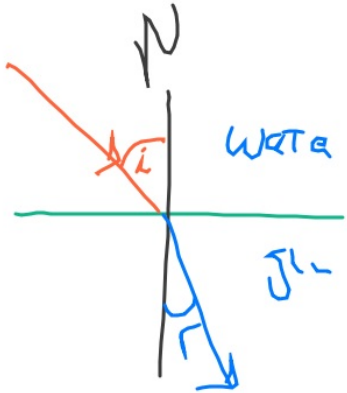

Greater Than 1, So Bends Towards Normal

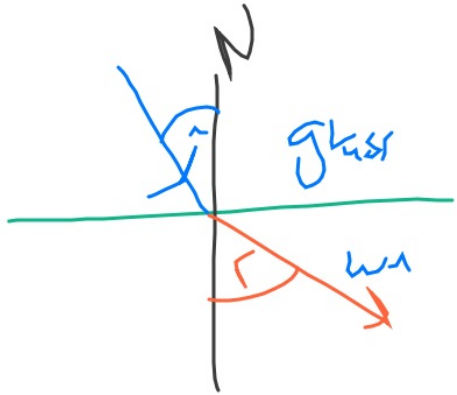

$$g n_w = \frac{n_w}{n_g}$$

$$= \frac{1.33}{1.5}$$

$$= 0.88$$

Less Than 1 Bends Away From Normal

$w n_g = 1.15$

$1.15 = \frac{n_g}{n_w}$

$\frac{n_w}{n_g} = \frac{1}{1.15} = 0.87$
